

SIYAM VIJAYARAJ

Software Engineer | MSc Data Science

📞 07476197884 | ✉ vijayarajsiyam01@gmail.com | 🔗 LinkedIn | 🌐 GitHub | 📍 London, UK

PROFILE

Software Engineer and MSc Data Science student with First Class Honours in Software Engineering and hands-on experience across full-stack development, data analysis, software testing and time-series forecasting. Experienced in developing web and software applications using Java, Python, JavaScript, React, Flask and Spring Boot, supported by practical database and API development skills. Built data-driven solutions including a food sales forecasting platform using Prophet, and contributed to real-world software projects within Agile environments. Seeking a software engineering, data-focused development or graduate technology role in the UK where strong programming, analytical and problem-solving skills can be applied.

KEY SKILLS

Programming Languages: Java, Python, JavaScript, SQL, R

Frameworks & Technologies: React, Node.js, Flask, Java Spring Boot, JavaFX, Java Swing, Firebase

Databases: PostgreSQL, MySQL, MongoDB

Data Science & Analytics: Time-Series Forecasting, Prophet, Data Analysis, Data Cleaning, Data Visualisation, Microsoft Excel

Development & Testing Tools: Git, GitHub, Postman, Figma, Trello, MySQL Workbench

Software Engineering Practices: Agile, REST API Development, API Testing, Usability Testing, Version Control

Transferable Skills: Problem Solving, Analytical Thinking, Adaptability, Teamwork, Communication, Time Management

WORK EXPERIENCE

Software Engineering Intern | Techorin

Mar 2025 – Sep 2025

Colombo, Sri Lanka

- Contributed to frontend and backend development of dynamic web applications within an Agile software development environment.
- Performed usability testing to identify user experience issues and support improvements to application functionality and interface design.
- Supported debugging, API testing and feature validation to improve application reliability before deployment.
- Collaborated with team members throughout the development lifecycle, gaining practical experience in developing, testing and deploying production-level software features.

Data Analyst | Survey Research Lanka

2023 – 2025

Colombo, Sri Lanka

- Analysed and reviewed survey datasets using Microsoft Excel to support accurate reporting and research activities.
- Performed data cleaning, validation and quality checks to identify incomplete, inconsistent and inaccurate survey records.
- Improved data accuracy by 15% through systematic review and verification of survey data.
- Organised and prepared datasets for analysis and reporting, supporting reliable interpretation of research findings.

PROJECTS

Meals Forecast — Final Year Research Project, 2025

 [GitHub](#)

- Designed and developed a data-driven food sales forecasting system to help small shops in Sri Lanka predict demand and reduce food wastage.
- Implemented time-series forecasting using Prophet to generate weekly, monthly and event-driven sales predictions from historical data.
- Developed a full-stack web application using React, Flask and PostgreSQL, including interactive dashboards, calendar functionality and administrative features.
- Integrated forecasting results into a user-facing platform to support inventory planning and data-driven business decisions.

Gold Management System — Academic Project, Inov8IT

 [GitHub](#)

- Collaborated within a team to develop a Gold Management System as an academic project, which progressed into a real-world solution and is currently running in a live operational environment.
- Developed functionality for managing gold assets, inventory, transactions and operational records within a centralised system.
- Contributed to a maintainable application architecture designed to support ongoing business operations and future system development.
- Used Trello for task coordination and Postman for API testing throughout the development process.
- Technologies:** Java, JavaFX, MySQL, Postman, Trello.

E-Mart Grocery Mobile Application — Academic Group Project

 [GitHub](#)

- Developed a mobile grocery shopping application with product search and cart management functionality, focused on accessible and user-friendly navigation.
- Worked with Firebase for application data and Figma for interface design and prototyping.
- **Technologies:** Java, Firebase, Figma, Android Studio, Maven.

Virtuvibe Academy — Music Class Management Website

 [GitHub](#)

- Developed a management website for a music academy to manage students, teachers and calendar events, with dark and light mode support.
- Developed frontend and backend functionality using React and Java Spring Boot with MySQL for data management.
- Conducted API testing with Postman to validate endpoints and support application reliability.
- **Technologies:** React, Java Spring Boot, MySQL Workbench, Postman.

Administrative Software — Academic Group Project (Team of 8)

 [GitHub](#)

- Collaborated within an eight-member team to develop administrative software for automating invoice generation, receipt printing and user enrolment.
- Applied object-oriented programming principles to develop maintainable desktop application functionality.
- **Technologies:** Java, Java Swing, OOP.

EDUCATION

MSc Data Science | University of Greenwich
London, UK

Jan 2026 – Present

- Currently pursuing a Master’s degree in Data Science.

B.Sc. (Hons) Software Engineering | University of Bedfordshire
Affiliated with SLIIT City Uni, Sri Lanka

Sep 2024 – May 2025

- Awarded First Class Honours.

Higher National Diploma | SLIIT City University
Sri Lanka

Sep 2022 – Sep 2024

- Dean’s List — recognised for outstanding academic excellence, Year 2 Semester 2, 2024.

GCE Advanced Level (Physical Science) & Ordinary Level | Hartley College
Sri Lanka

2012 – 2020

CERTIFICATIONS & AWARDS

- Dean’s List Award — SLIIT City University
- Computer Application Assistant Course — Zonal Education Department
